Cybersecurity Vendors

- Web Application and API Protection
- Imperva WAF is a key component of a comprehensive Web Application and API Protection (WAAP) stack that secures from edge to database, so the traffic you receive is only the traffic you want.
- We provide the best website protection in the industry – PCI-compliant, automated security that integrates analytics to go beyond OWASP Top 10 coverage, and reduces the risks created by third-party code.

Imperva Web Application Firewall Can Secure:

- Active and legacy applications
- Third-party applications
- APIs & Microservices
- Cloud applications, containers, VMs and more

Data Activity Monitoring (DAM) End-to-end data security

- Data discovery and classification
- Data access control
- Data risk analytics
- Threat detection & prevention
- Mitigation & response
- Compliance management
- On-premises
- Hybrid multi-cloud
- Big Data
- Data Lakes

- Managed Database Services (DBaaS)
- 260+ Built-in integrations
- SIEM solutions
- Data Masking
- Data Encryption
- Nonstructured Data
- Identity Management
- Web Application Firewall
- CMDB Management
- Enterprise SOAR

CHECK POINT™

- **Quantum™ Network Security** - Next Generation Firewall Security Gateways™ combine SandBlast threat prevention, hyper-scale networking, a unified management platform, remote access VPN and IOT security to protect you against the most sophisticated cyber-attacks.
- **Harmony for remote users** is the industry's first unified security solution for users devices and access. It protects devices and internet connections from the most sophisticated attacks while ensuring zero-trust access to corporate applications.
- **CloudGuard for Cloud Native Security**
Check Point CloudGuard provides unified cloud native security for all your assets and workloads, giving you the confidence to automate security, prevent threats, and manage posture – everywhere – across your multi-cloud environment.

- **Infinity-Vision Unified Security Management** - Achieve the gold standard in cyber security with the unified security management delivered by Infinity-Vision. Ensure that your organization can prevent breaches and manage your entire security environment with unified policies from a single pane of glass across networks, cloud, mobile, endpoint and IoT device. Detect, respond, and shut down attacks faster with 99.9% precision using the same SOC tools developed by Check Point Research for their cyber-attack investigations.
- **Incident Response Team (CPIRT)** offers 24/7, data (Intelligence)-driven, and vendor-agnostic incident response services. The CPIRT global team helps our customers manage, mitigate, and understand active cyber incidents. The team helps customers of all sizes prepare for cyber incidents through proactive services; such as Playbook Development, Tabletop Exercises, and Threat Hunting.

DNSense

➤ DNSense – Secure DNS Cloud Solution

Dynamic Security Protection which could be deployed in seconds - Cloud Solution

- Robust and Powerful Defense
- Fullest Extent of DNS Traffic with Precision in One Screen
- Easy Deployment and Integration to Existing Assets

➤ DNSense – DNS Visibility On-prem Solution

Managed Detective & Response, Vulnerability Analysis and Management - On Premise Solution.

- Advanced DNS Visibility
- Security Gap Analysis
- SIEM Integration
- Malware Sinkhole and EDR integration
- Domain/IP Enrichment
- Threat Hunter

Hive Pro

- **HivePro** Uni5 focuses on Predictive Attack Surface Reduction using Vulnerability as a pivot.

Typically, any organization's ability to remediate vulnerabilities today is only 15% of active vulnerability count. Organizations are moving away from trying to fix all of the vulnerabilities to focusing on vulnerabilities that matters. Except, they struggle with multiple sources of "what really matters".

Using various siloed tools like Vulnerability Management, Vulnerability Prioritization, Breach and Attack Simulation, PenTesting, customers consume multiple vulnerability ratings but are still unable to find a single console to represent the actual risk.

- Uni5 focuses on the Attack Surface Management challenge by using vulnerabilities and threats as pivots to assist customers to reduce the attack surface of breaches. The platform provides a unified view of the true risk of all vulnerabilities using a combination of asset criticality, external threat context, internal compensatory control context, and patch intelligence. We help customers proactively reduce their attack surface before it gets exploited.

One of the biggest producers of IT and industrial racks, and data center solutions in EMEA.

Conteg has a wide range of solutions that includes Telecommunication, data, industrial and outdoor racks, Complete solutions for data centers including systems of precision cooling, Intelligent power distribution monitoring systems and Cable management systems.

Applies strict ISO 9001 quality management standards at Conteg. All our products undergo a strict testing regime to obtain TÜV certificates.

Products are meticulously constructed from quality materials which comply with technical and environmental specifications and are thoroughly tested and inspected prior to leaving our manufacturing facility.

NETWORK INFRASTRUCTURE

A leading Global cabling and connectivity solution provider for high end-communication networks since 1964.

One of the top three players in Europe and the Middle East.

Offers solutions based on these technologies in three divisions: Data Center, LAN and Public Networks. Software solutions for network management and monitoring round off the portfolio.

Solutions are compelling in their ability to deliver excellent availability and cost-effective network operations. With its high product quality and forward-looking system design, R&M ensures that networks are fit for the future and that investments remain sound in the long term.

Helps individuals and organizations to communicate quickly and efficiently without limitation.

Customers benefit from consistently high Swiss quality standards as well as our innovative future-proof solutions.

INVIXIUM

- Founded in 2012 headquartered in Toronto, Canada.
- During Invixium's 8 years of innovation it has been identified as one of the top biometric access control brands in the world. In this short span, they have launched 5 Intelligent products and an enterprise level software.
- Invixium is passionate about updating and redesigning the biometrics products into access control and workforce management in the best quality, design and innovation.
- The First Biometric Company to offer customization services to tailor specific clients needs.

”

RMG is the global leader in enterprise-class digital signage, delivering real-time information and content for critical contact center, supply chain and employee communications applications.

Creates integrated software and hardware for managing the collection, design, scheduling and delivery of digital messaging to a broad array of visual solutions.

Provides each customer with a single point of accountability for every aspect of an intelligent visual communication solution. RMG's scope of responsibility includes consulting, creative design, content services, installation, user training and technical support.

RMG networks has been providing visual communications solutions to customers for more than 30 years.

Dahua North America combines stellar customer service with unparalleled technology to create high performance security and solutions for our clients. Our comprehensive solutions comprise a wide range of features, including video management software and award-winning security cameras. Our dual emphasis on constant technological innovations and client support helps us deliver exceptional quality, reliability, and stability to both our end users and reseller partners.

”

Dahua’s extensive spectrum of products means that we have a security solution for every need and budget. We offer network and HDCVI cameras, recorders, NVRs, and accessories, each ranging across our different series offerings, including Lite Series, Pro Series, and Ultra Series.

Dahua Technology USA Inc. is a subsidiary of Dahua Technology, a global leader of video surveillance equipment manufacturing, according to an Omdia 2021 report. Dahua’s expertise in designing and manufacturing video surveillance products for professional applications spans over 20 years — with over 1,700 patents filed and 6,000 plus R&D professionals.

The Dahua US and Canada teams are filled with dedicated and experienced industry professionals who thrive on building relationships and working to provide the best possible experience for customers. The North American region is led by Tim Wang, President and CEO, and several industry experienced executives.

Founded on September 25, 1968, Allis Electric Co., Ltd. started by producing low-voltage switchgear, motor control centers, high/low-voltage integrated start-up panels, AC/DC industrial control equipment, and transmission & distribution apparatus.

Its steady operations led to the development of independent departments that produce transformers, switching devices and electronic.

WHO IS HUAWEI

Huawei is a leading global provider of information and communications technology (ICT) infrastructure and smart devices. With integrated solutions across four key domains – telecom networks, IT, smart devices, and cloud services – we are committed to bringing digital to every person, home and organization for a fully connected, intelligent world.

About Huawei Consumer Business Group

As one of Huawei's three business groups, Huawei Consumer BG is the leader of the all-scenario AI life. It covers smartphones, PC and tablets, wearables, mobile broadband devices, family devices and device cloud services. Huawei Consumer BG is dedicated to delivering the latest technologies to consumers and sharing the happiness of technological advances with more people around the world. Walk the walk and make dreams come true.
